**Responses to Submitted Questions Related to
Request for Qualifications: Intelligent Transportation Systems Consultant**

The Request for Qualifications (RFQ) titled “Intelligent Transportation Systems Consultant” was issued on June 20, 2025. Potential submitters were permitted to send in questions related to the RFQ document through July 3, 2025. The following question was submitted, and is followed by an answer from Central Pines Regional Council (CPRC) staff. This question and answer document is being posted on the CPRC website along with the RFQ document.

Question: If a Prime is qualified for discipline codes 00123 (Intelligent Transportation System (ITS) Design) and/or code 00464 (ITS Operations), does their sub consultant also need to be prequalified for those codes?

Answer: As long as the prime consultant is prequalified that is sufficient to meet the requirement – the sub consultant does not require prequalification. However, if both the prime consultant and any sub consultant(s) are prequalified that should be noted in the response for clarity.
